DETAILED ACTION

Response to Amendment

1. Amendment filed September 6, 2006 has been entered.
2. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
3. Applicant's arguments filed September 6, 2006, have been fully considered but they are not found persuasive.
4. Claims 1-31 have been canceled and claims 32-35 have been added.

Claim Rejections - 35 USC § 112

5. Claims 32 and 35 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Second, the claims recite "OCIF protein", which is indefinite. There is no structure associated with this term and there is no art accepted meaning of this term at the time the instant invention was filed. Therefore, the metes and bounds of what is to be encompassed by this term are unclear and the claims are indefinite.

Applicants argue that one skilled in the art would understand that the OCIF protein refers to a "...compound that is produced by human lung fibroblast cells and

inhibits osteoclast differentiation and/or maturation having a molecular weight of about 60 kD and about 120 kD under non-reducing conditions and about 60 kD under reducing conditions on SDS-polyacrylamide gel electrophoresis. However, terms are relative and can change from scientific paper to another. Furthermore, the term does not define the specific structure of the amino acid sequence.

Double Patenting

A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

6. Claims 33 and 34 are rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 1-2 of prior U.S. Patent No. 6,855,808. This is a double patenting rejection.

Claims 1-2 of U.S. Patent No. 6,855,808 anticipates the claims 33 and 34 of the present application. Applicants argue that there is an embodiment of the invention that falls within the scope of one claim but not the other. Since the claims are anticipated by one species over the generic claim, both sets of claims are encompassed within the genus.

7. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

8. No claim is allowed.
